SUMMARY

Data Analyst delivering measurable business impact through business intelligence, data visualization, and advanced analytics. Proven track record: 15% operational efficiency gains, 40% process automation savings, 95%+ data quality. Expert in Power BI dashboard design, SQL data extraction, and Python data analysis (EDA, hypothesis testing, predictive modelling). Skilled communicator translating complex analytics into actionable insights for stakeholders.

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI (DAX, data modelling, dashboard design), Tableau | **Data Management:** SQL (data extraction, data cleaning), Python (Pandas, NumPy, Seaborn, Scikit-learn), Excel (Power Query, data wrangling, pivot tables) | **Analytics & Methods:** Exploratory Data Analysis (EDA), Hypothesis Testing, Cohort Analysis, Predictive Modelling (Random Forest), Time Series, Root Cause Analysis, Reporting, Performance Metrics

PROFESSIONAL EXPERIENCE

Data Analytics Intern • TDI (The Data Immersed) • Remote Jun 2025 – May 2026

- Completed comprehensive 12-month data analytics internship (Excel, SQL, Power BI, Python); delivered end-to-end capstone project with data cleaning, EDA, hypothesis testing, and predictive modelling (Random Forest) on healthcare dataset.
- Mastered Python data analysis libraries (Pandas, NumPy, Seaborn); built interactive dashboards and professional deliverables (Word report, PowerPoint presentation, HTML dashboard) demonstrating advanced communication and visualization skills.

Data Analyst Intern • The Analytics School • Remote May – Jun 2025

- Designed and built 3 interactive Power BI dashboards and engineered 15+ DAX measures for business intelligence (student enrolment, revenue analytics, staff performance); improved institutional outcomes by 10%.
- Performed data cleaning and validation on multi-source datasets using Power Query and SQL; reduced data quality errors by 30%.

Data Analyst Intern • Celerity Network Ltd • Abuja Dec 2024 – Mar 2025

- Delivered Power BI customer analytics and sales analytics reports; performed root cause analysis on performance metrics, achieving 15% operational efficiency gain and 95%+ accuracy across all reporting.
- Automated recurring reporting pipelines using SQL and Excel; cut manual report generation time by 40% through process automation.

KEY PROJECTS

School Management Intelligence System (SMIS) — Python, Pandas, Data Analysis | Analysed 1,500+ student records; built interactive dashboard for data visualization and customer analytics; identified attendance-performance correlation and subject-level trends.

Metro Sales Performance Dashboard — Business Intelligence, Excel, SQL, Power BI | Investigated 53% YoY revenue decline; performed root cause analysis across 4 categories, 3 regions, 4-year trend; identified premium segment (47% margin); delivered data visualization and reporting.

CRM Pipeline Analytics — Power BI, SQL, DAX, Data Modelling | Built end-to-end business intelligence solution for sales analytics; analysed pipeline health, deal ageing, win/loss metrics, and customer concentration risk; improved forecasting accuracy and performance metrics via KPI design.

EDUCATION & CERTIFICATIONS

B.Sc. Physics • University of Abuja | **Google Professional Data Analytics Certificate** • 2023

Data Analytics Programme (Excel, SQL, Power BI) • TDI, May 2026 | **Python for Data Analytics**

Capstone (EDA, Hypothesis Testing, Predictive Modelling) • TDI, May 2026
