PROFILE

Data analyst with experience preparing SQL and Excel reporting and building Power BI dashboards. Projects span sales performance, CRM pipelines and data quality, with an emphasis on explaining metric definitions and the limits of sample data.

TECHNICAL SKILLS

Analysis: SQL, Excel, Power Query, Python (pandas, NumPy) · **Reporting:** Power BI, DAX, data modelling, KPI definitions, dashboard design · **Communication:** business questions, data-quality checks, findings and recommendations

EXPERIENCE

Data Analyst | Celerity Network Ltd, Abuja | Dec 2024 - Mar 2025

Analysed sales, customer and discount data in Power BI. Prepared recurring SQL and Power Query reports and ad hoc reviews of pricing and pipeline performance.

SELECTED PROJECTS

Metro sales performance | Excel and SQL

Compared January–May sample records: sales rose from \$10.02m (2019) to \$12.65m (2020), while sales minus recorded cost narrowed from \$399k to \$30k. Investigated product and regional mix; avoided treating a partial 2020 year as a full-year comparison.

CRM sales opportunities | Power BI

Modelled Maven Analytics' fictitious CRM dataset (8,800 opportunity rows). Analysed \$10.01m in won revenue and a 63.1% win rate among closed deals, with separate views of open opportunities, customers and stage progression.

Supply chain data quality | Python

Audited a 3,000-order simulated dataset and found 2,683 missing order dates. Built a reproducible quality and category-cost analysis and documented why monthly trends cannot be verified from the supplied file.

TRAINING & EDUCATION

Data Analytics Programme — Data Immersed Community, 2025–2026 · Excel, SQL, Power BI and Python training

Data Analytics Training — The Analytics School, 2025

Google Data Analytics Professional Certificate — Coursera, 2023

B.Sc. Physics — University of Abuja, 2017
